Construction Guide St. Louis Highway

Know_{the} ZONES

work zone locations and delays.

A comprehensive map allows motorists to organize their work zone search by trip origin and destination, route or region. Color-coded icons display active sites by degree of delay. Text displays describe the duration of the work zone, the type of work being done and expected lane closures.

Did You Know?

MoDOT will have its largest construction season ever in 2006. In the St. Louis area alone, more than 150 new highway construction projects will begin in 2006. We know work zones can be an inconvenience, but they mean MoDOT is working to make the roads **SMOOTHER** and **SAFER** for you, as **SOON** as possible.

The Difference is YOU.

Roadway construction frequently requires lane closures, and work zones can be dangerous places for both highway workers and motorists.

Consider These Statistics:

- In 2004, 28 motorists were killed and more than 1,100 were injured in Missouri work zone crashes.
- In 2004, one person was killed or injured in a Missouri work-zone crash every 7.4 hours.
- In 2005, 28 MoDOT employees were injured in work zones.
- Since 1945, 71 MoDOT workers have died as a result of work-zone crashes.

Buckle Up! - Every trip, every time - safety belts save lives. Stay Alert! - Dedicate your full attention to the roadway. Obey Signs! - They'll guide you through the work zone safely. Don't Speed! - Note the posted limits and adjust for weather conditions.
